Summary

Full-Stack .NET Developer with 3+ years of experience building and supporting enterprise applications using **C#, ASP.NET Core/.NET, Web API, Angular, SQL Server, Entity Framework, and Azure**. Experienced in **end-to-end application development, REST API development, production support, Linux/RHEL and Nginx administration, application deployment, security remediation, and disaster recovery operations**. Currently serving as a primary developer for an enterprise **Early Warning Signal and Intelligent Transaction Monitoring platform** in the banking domain, with hands-on ownership across development, deployment, troubleshooting, and production operations.

Experience

Software Engineer - D2K Technologies (A Group ICRA Company) **(09/2025 - Present, New Delhi)**

Client: Punjab National Bank (PNB) | Project: EWS (Early Warning Signal)

- **Primary developer** for an **Early Warning Signal (EWS) and Intelligent Transaction Monitoring System** for Punjab National Bank, supporting post-sanction credit monitoring and automated borrower risk assessment.
- Developed and enhanced **full-stack features** using **.NET MVC, Web API, Angular, SQL Server, Entity Framework, and LINQ**, covering UI, REST APIs, business logic, and database operations.
- Independently managed **12 Linux/RHEL application servers and 10 Nginx servers**, handling application deployments, service management, process monitoring, log analysis, configuration, and production troubleshooting.
- Managed the **end-to-end application lifecycle**, including requirements analysis, development, database changes, testing, deployment, production support, and operational maintenance.
- Supported **6 Disaster Recovery (DR) drills** by validating application availability, server connectivity, DNS changes, services, and recovery environments.
- Addressed **VAPT, security audit, and SOC requirements**, including security headers, CSP, cookie security, logging, dependency upgrades, application hardening, and audit documentation.
- Developed and maintained an **automated data crawler** integrating external APIs to ingest financial, regulatory, ratings, news, and corporate data processing approximately **7 lakh records** for the EWS platform.

Software Engineer – Neurealm (Formerly GAVS Technologies) **(08/2023 - 04/2025, Chennai)**

Client: Premier | Project: HRP (Human Resource and Payroll)

- Worked on the **Human Resource and Payroll (HRP)** project, contributing to Administrator Maintenance, Employee Self-Service (ESS), and Manager Self-Service (MSS) portals.
- Resolved and delivered 80+ production/application tickets across SQL stored procedures, 10+ RESTful APIs, backend business logic, and Angular UI components.
- Contributed to Agile Scrum ceremonies including sprint planning, daily stand-ups, and retrospectives.
- Worked with **Angular, .NET WebAPI, Microservices, Entity Framework, LINQ, MS SQL**, and **Azure**.
- Resolved client queries, discussed business requirements, and presented code fixes through detailed technical walkthroughs.

Skills

Languages: C#, TypeScript, JavaScript, SQL

Frontend: Angular, HTML, CSS, Bootstrap

Backend: .NET / ASP.NET Core, ASP.NET MVC, Web API, Entity Framework / EF Core, LINQ, REST APIs

Cloud & Infrastructure: Microsoft Azure, Linux/RHEL, Nginx

Tools & Version Control: Postman, Swagger, Visual Studio, VS Code, Github, Bitbucket

---

Education

Bachelor of Technology (Lovely Professional University) **(07/2019 - 07/2023)**
Computer Science Engineering

Personal Projects

Employee Management System **(07/2022)**

- Developed a full-stack **Employee Management System** using **Angular, ASP.NET Core 8 Web API, Entity Framework Core, and SQL Server**.
- Implemented **JWT-based authentication and authorization**, **RBAC** including login, token-based API security, and protected application endpoints.
- Developed core modules for **Employee Information, Payroll, and Attendance**, with RESTful API integration and database-driven operations.

TechQues : Learning Platform **(01/2023 - 04/2023)**

- A learning platform for all tech enthusiasts having topics spread across all major tech and programming languages.
- Built using tech stack Angular, .NET and SQL REPO

Personal Portfolio **(07/2022)**

- Built a professional portfolio using React, HTML, and CSS. REPO
- Link: https://saurabhdevportfolio.netlify.app

Certifications

- **Azure IaaS and Azure PaaS Architecture and Solutions** **(02/2025 - 03/2025)**
